

ASBESTOS SURVEY REQUIREMENTS

Yolo-Solano Air Quality Management District Rule 9.9, ASBESTOS, Section 301.1 states,

SURVEYS: Except for ordered demolitions, prior to commencement of any demolition or renovation, the owner or operator shall thoroughly survey the affected stationary structure or portion thereof for the presence of asbestos-containing material, including Category I and Category II nonfriable asbestos-containing material.

- a. The survey shall be performed by a person who has taken an EPA- approved Building Inspector course and conforms to the procedure outlined in the course.
- b. When a building owner or operator engages the services of a person to perform asbestos consulting or site surveillance activities, the building owner or operator shall contract with a person who is certified by the Division of Occupational Safety and Health pursuant to regulations required by subdivision (b) of Section 9021.5 of the Labor Code.
- c. The survey shall include one of the following:
 - (1) The results of sampling and laboratory analysis of the asbestos content of all suspect asbestos-containing materials, or
 - (2) The reason the material is believed to contain asbestos by the person performing the survey.
- d. When a stationary structure is demolished under an ordered demolition, the survey must be done after demolition but prior to handling, loading or removal of any demolition debris.

The following list of companies is provided as a convenience and is not an endorsement or certification of any business listed. It is your responsibility to ensure that the person conducting the survey meets the requirements of Rule 9.9, Section 301.1, a. & b, as outlined on the front of this document. If you are a certified asbestos consultant and are not on this list but would like to be added, please contact David Smith at (530)757-3650 or dsmith@ysaqmd.org.
