

Yolo-Solano Air Quality Management District 2025 Solicitation

The District has more than \$2.2 million available in funding through the Carl Moyer, Community Air Protection (CAP) Incentives, Targeted Airshed Grant (TAG), and AB 923 Programs. Eligible entities must be located and operate within Yolo Solano Air Quality Management District's jurisdiction, which includes all of Yolo County and the northeastern portion of Solano County, including the cities of Dixon, Rio Vista, and Vacaville.

Carl Moyer Program

The Carl Moyer Program was established in 1998 as a partnership between the California Air Resources Board (CARB) and local air districts. The program provides monetary grants to private companies and public agencies to turn over heavy-duty engines sooner than what is required by law and regulation. The Moyer Program also funds infrastructure projects to support California's transformation to zero and near-zero emission technology.

Community Air Protection (CAP) Incentives Program

The CAP Incentives Program's focus is to reduce exposure in communities most impacted by air pollution. In 2017, the California Legislature appropriated CAP Incentives Program funding to be administered by air districts in partnership with local communities to support early actions to address localized air pollution. This program offers funding for Carl Moyer-eligible projects that benefit low-income and disadvantaged communities within the District.

Targeted Airshed Grant (TAG) Program

The District was awarded funding through U.S. EPA Targeted Airshed Grant Program to administer a low-dust harvesting equipment replacement grant program. The program will offer up to \$49,000 in funding for the purchase of new low-dust harvesting equipment resulting in a reduction of particulate matter emitted within the District and the Sacramento PM2.5 Non-Attainment Area.

AB 923

As a result of the signing of AB 923 in 2004 by Governor Schwarzenegger and the approval by the District's Board of Directors, the District receives a \$2 fee from the California Department of Motor Vehicles for vehicles registered in the District's jurisdiction. The District's Board of Directors has allocated funds received through AB 923 to infrastructure installation, public agencies' heavy-duty fleet vehicle replacement projects, and agricultural off-road equipment replacement projects.

Solicitation Schedule

March 3, 2025 (8 a.m.)	Solicitation Opens
May 2, 2025 (4 p.m.)	Solicitation Closes
June 9, 2025	Deadline to Notify Applicants of Missing Information
July 9, 2025	Deadline to Present List of Selected Projects to APCO
July 31, 2025	Applicants Notified of Tentative Awards

Applications and Resources

Complete the appropriate application form, attach all necessary documentation, sign the signature pages, and submit the completed application to grants@ysaqmd.org or mail to YSAQMD, 1947 Galileo Court, Suite 103, Davis, CA 95618. Applications must be received by 4 p.m. on the closing date; postmarks and faxes will not be considered. Application materials and resources can be found on the district website, www.ysaqmd.org by going to the Incentive tab on the drop-down menu.

Two applications will be accepted per applicant for equipment located in disadvantaged communities, while a single application will be accepted per applicant for equipment located in all other areas. There is not a restriction on the number of applications that may be submitted by public agencies for the replacement of heavy-duty fleet vehicles.

Applicants selected for funding in the 2024 Solicitation will not be eligible to receive funding through the 2025 Solicitation, unless the equipment is located in a disadvantaged community.

Eligible Project Categories

The Carl Moyer Program, CAP Incentives Program, TAG Program, and AB 923 fund projects that reduce emissions from mobile and stationary equipment. If the 2025 solicitation is oversubscribed for a grant program or category, applications will be selected for funding through a random drawing. During this solicitation, applications will be accepted for the following categories:

Category	Description	Funding Cap
On-Road	Zero-Emission replacements for school buses over 14,000 GVWR; Heavy duty vehicle replacements (14,000 - 33,000+ GVWR); Emergency vehicles.	Range between 50-80%, up to \$150,000, for zero-emission and \$30,000 - \$40, 000 for convention diesel replacements.
Off-Road	Small Fleets and Exempt Agricultural Equipment replacement to cleaner technology; Priority will be given to qualifying pilot projects; Applications to replace Tier 0 and Tier 1 equipment will be entered twice into the random draw.	\$150,000 per piece of equipment.
Off-Road: Low-Dust Harvesters	Replacement of nut harvesting equipment with low-dust models. Replacement equipment must be selected from an eligible equipment list or authorized by the District. Equipment must operate within the District and within the Sacramento PM2.5 Non-Attainment Area.	\$49,000 (PTO) per equipment
Infrastructure	New battery charging and alternative fueling station installation; Priority will be given to qualifying school bus, public agency, and publicly accessible charging stations; Infrastructure supporting on or off-road projects must be submitted with the equipment application to be considered.	60% for eligible projects, with increased funding for public accessibility, alternative power, and school buses, up to \$150,000.

Disadvantaged Communities

Applications in disadvantaged communities will be prioritized for funding in all project categories and will be awarded using CAP funding first, in accordance with CAP Incentive guidelines. The funding cap for projects located in disadvantaged communities is \$200,000 for the on-road, off-road, and infrastructure categories.
